Go this weekend. Best day: Tue, Oct 20, about 9 in 10.
LOOK FOR 3-5 lobes with toothed edges and V-shaped notches; scarlet, orange or yellow, often among the first to turn.

GO

sugar maple*Acer saccharum*

2 green · **8 color** · 0 bare (in 10)
About 8 in 10 sugar maples you find this weekend should show fall color.
Go this weekend; even more color around Tue, Oct 20.
LOOK FOR 5 lobes with smooth, U-shaped notches and few teeth; glowing yellow, orange or orange-red.

GO

black gum*Nyssa sylvatica*

3 green · **7 color** · 0 bare (in 10)
About 7 in 10 black gums you find this weekend should show fall color.
Go this weekend; even more color around Tue, Oct 20.
LOOK FOR Glossy oval leaves with smooth edges; one of the first trees to turn, a deep scarlet.

STARTING

northern red oak*Quercus rubra*

5 green · **5 color** · 0 bare (in 10)
About 5 in 10 northern red oaks you find this weekend should show fall color.
Starting to turn; best around Tue, Oct 20 or later.
LOOK FOR 7-11 pointed, bristle-tipped lobes; russet to deep red, turns late and often holds its leaves.

WAIT

American beech*Fagus grandifolia*

8 green · **2 color** · 0 bare (in 10)
About 2 in 10 American beeches you find this weekend should show fall color.
Mostly green; best around Tue, Oct 20 or later.
LOOK FOR Oval leaves with straight parallel veins, each ending in a tooth, and smooth gray bark; golden bronze, turns late.

WAIT

Norway maple*Acer platanoides*

9 green · **1 color** · 0 bare (in 10)
About 1 in 10 Norway maples you find this weekend should show fall color.
Mostly green; best around Tue, Oct 20 or later.
LOOK FOR Broad 5-lobed leaves with pointed tips, milky sap in a broken leaf stem; turns yellow, very late.

GO

sassafras*Sassafras albidum*

3 green · **7 color** · 0 bare (in 10)
About 7 in 10 sassafras you find this weekend should show fall color.
Rarely recorded within 50 km; go this weekend. Best day: Fri, Oct 16, about 8 in 10.
LOOK FOR Mitten-shaped, three-lobed and unlobed leaves on the same tree; orange, red, yellow or purple.

GO

sweetgum*Liquidambar styraciflua*

3 green · **7 color** · 0 bare (in 10)
About 7 in 10 sweetgums you find this weekend should show fall color.
Rarely recorded within 50 km; go this weekend; even more color around Tue, Oct 20.
LOOK FOR Star-shaped leaves with 5-7 pointed lobes; often purple, red and yellow on the same tree, spiky seed balls underneath.

Listed last: trees with fewer than 5 research-grade iNaturalist observations within 50 km.
Forecast: TabPFN v2 on iNaturalist observations + Open-Meteo weather. Built with PriorLabs-TabPFN. Weather data by Open-Meteo.com.
TabPFN v2 classifier (open weights, CPU); 1,000 past observations as context; weather since Sep 1 plus a 2-week forecast; ran in 99 s; made Oct 6, 19:18 UTC.
Each chance is for one tree you come across, not the share of the canopy.

After your walk, add what you saw to iNaturalist (inaturalist.org) with the "Leaves" annotation (green, colored or no live leaves). Those notes are the data this model learns from.
